

M E M O R A N D U M

TO: FILE
FROM: LEE SIM 
SUBJECT: SUMMIT CREEK DISTRIBUTION MEETING
DATE: June 25, 1991

This memo covers a discussion at the meeting concerning the exchange water which is to be delivered to the "Black Pipe".

There is a 1980 agreement between Hyde Park City and Smithfield Irrigation Company which transfers 55 shares of Logan North Field (Twin Canals) stock, from the City to the irrigation company. There are a total of 1400 shares in the Logan North Field Company.

On the basis of this transfer, the canal company has agreed to deliver 1 cfs to Smithfield Irrigation Company at the Black Pipe and Hyde Park City will pay the assessments on those shares. In exchange for this, Hyde Park City may take an equivalent (1 cfs) flow of water from Birch Spring.

Smithfield City also has an agreement with Smithfield Irrigation Company whereby they take water from the springs in Summit Creek Canyon and in exchange, allow the irrigation company to use 109 shares of Logan North stock which is also to be delivered at the Black Pipe. There are a total of 18 shares in the Logan North Company. This agreement is not as tight as the Hyde Park Agreement because the volume of the exchange is not quantified. In addition, Smithfield Irrigation Company owns shares

of stock in the Logan North Company. However, officially this water should not be delivered at the Black Pipe yet because there have been no change applications filed taking land out of service in the Logan North area and moving it to Smithfield.

There is one other exchange between Hyde Park City and Smithfield Irrigation Company which was dated 1930. This exchange allows Hyde Park City to take 0.5 cfs from Birch Springs and transfer to the irrigation company 25 shares (approximately 1 cfs) of Logan and Richmond District stock. This irrigation district doesn't exist and it could be that its successor is the Logan North Irrigation Company. This exchange probably is not delivered at the Black Pipe but at various places throughout Smithfield. Nothing will be done on this exchange until we get more information concerning it.

The 1980 exchange agreement water has not been transferred from the Logan North Field diversion on the Logan River to the upper canal diversion. Bob Fotheringham will contact Terry Gnehm and have this done. Hyde Park City gets between 300 and 500 gpm from Birch Springs as its part of the exchange.
